MemoLex

turns vocabulary study into retained knowledge

Spaced repetition across 15 languages, trusted by 4.9M learners

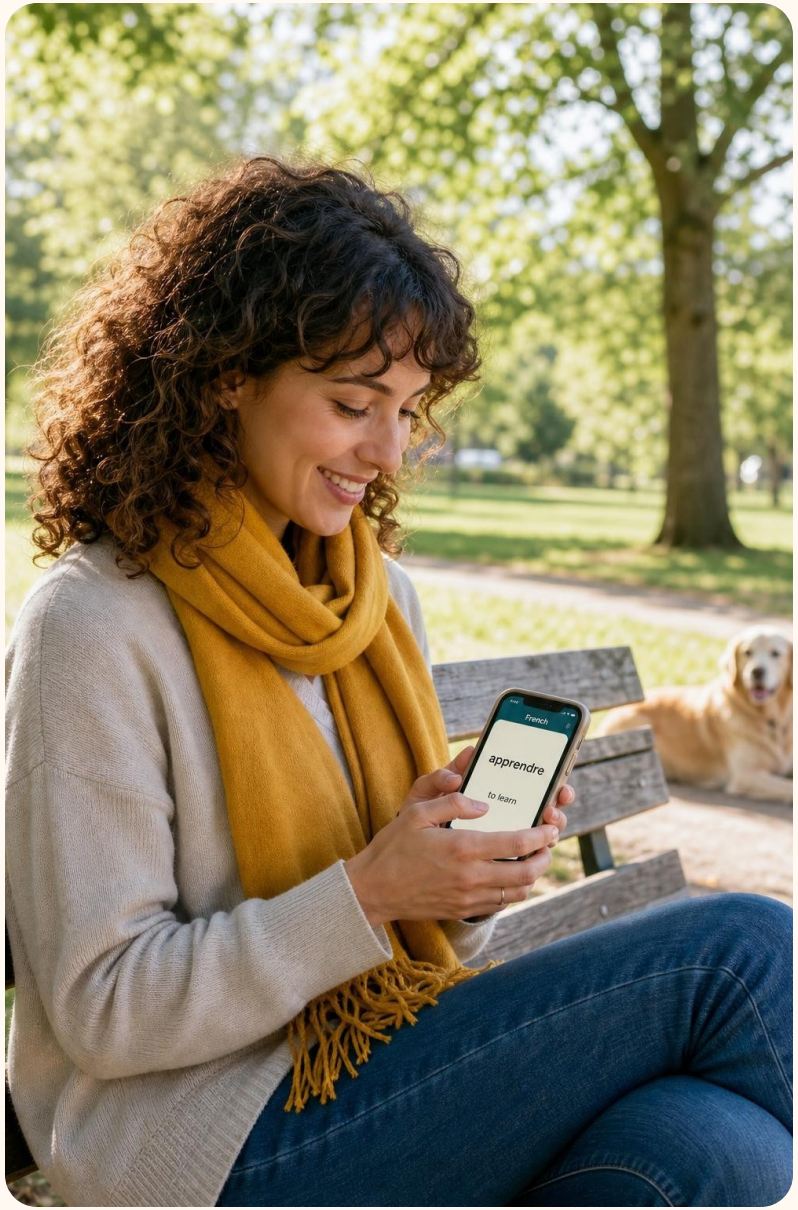

Scheduled review turns study time into lasting retention

The problem: forgetting

Without review, most new words fade within days, so study effort is wasted.

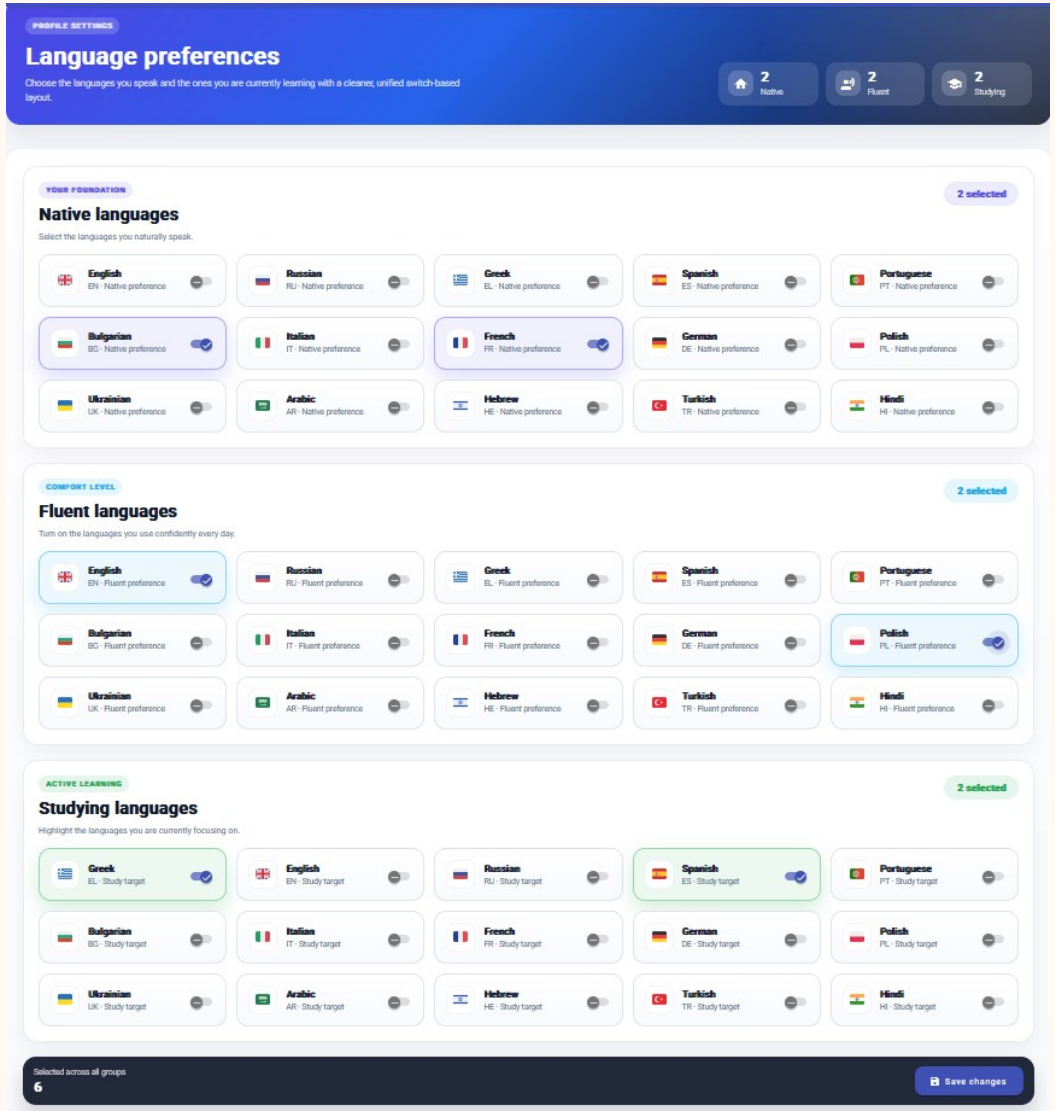

The solution: timed review

MemoLex schedules each word just before it is forgotten, focusing time where it pays off most.

95%

retention reported by scheduled learners

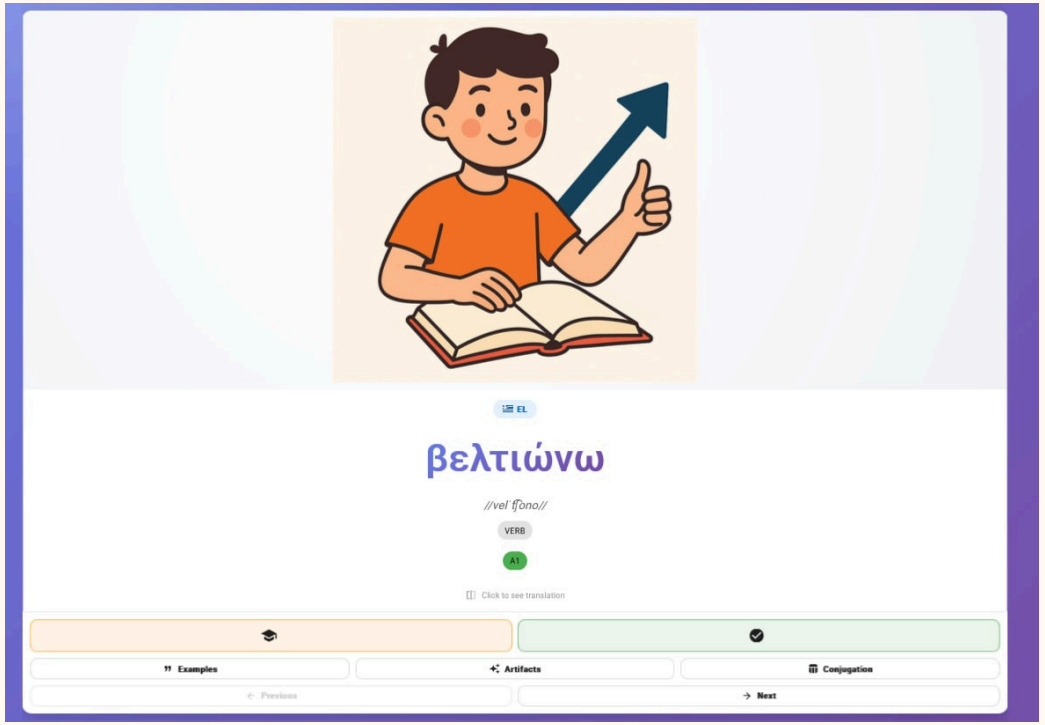

One screen configures every learner's language path

Simple switches set native, fluent and studying languages: onboarding in minutes.

Hints in known languages cut friction and speed up learning.

15 languages · 210 pairs

One flip card replaces three lookups, so learners retain more per session

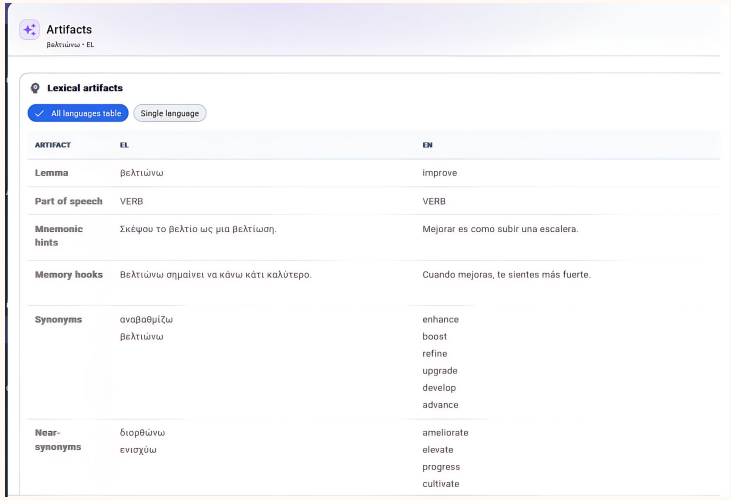

1. Context up front: illustration, transcription, part of speech and CEFR level cut lookup time.

2. Active recall: learners commit to an answer, then flip for the translation.

3. Study or Know ratings steer the next review, so time goes to the words that need it.

4. Examples, artifacts and conjugation are one tap away, with no app switching.

Side-by-side word depth across languages builds durable vocabulary

Memory hooks

Mnemonic hints improve recall and reduce repeat reviews.

Real range

Synonyms and near-synonyms widen active vocabulary beyond single translations.

Your view

One language or a full comparison table, matched to each learner's goal.

20-card mobile sessions turn spare minutes into steady progress

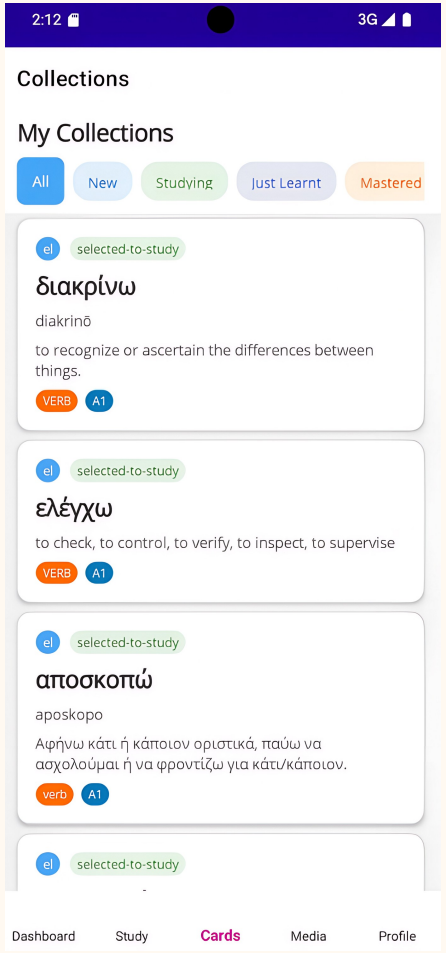

---

Short, focused sessions with a live progress counter (**0/20**) drive consistent daily habits

- Audio pronunciation on every card builds speaking confidence
- One-thumb controls keep each session fast, on any device

Stage-based collections show exactly where every word stands

4 Mastered

Filter by stage to focus study time where it is needed.

Analytics and AI turn study time into measurable retention

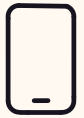

Clear analytics

Track learning progress and upcoming reviews in one view.

AI picks

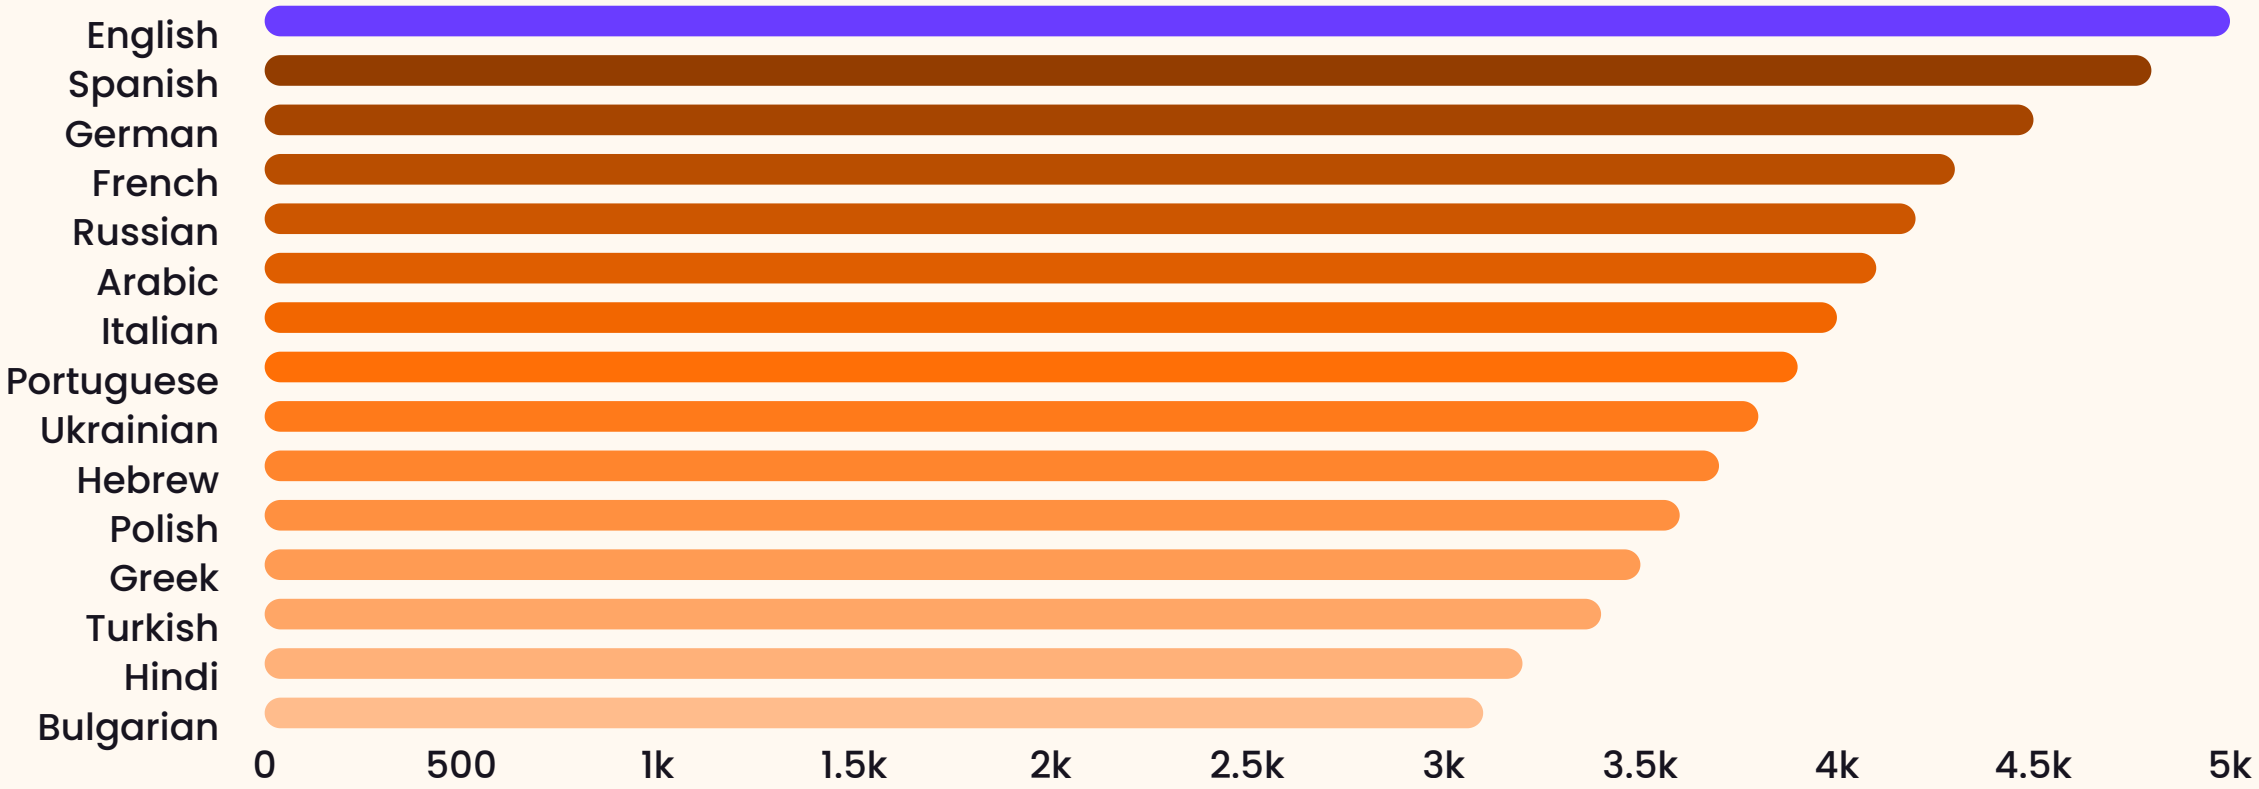

Recommendations driven by performance focus effort where it pays off.

Always on

Available 24/7 on web and mobile, so learning fits any schedule.

59,100 ready-made cards across 15 languages: scale from day one

Over 3,000 ready cards per language: no content creation, immediate start.

MemoLex closes the gaps that other learning tools leave open

Alternative	MemoLex business value
Gamified course apps	Deeper vocabulary mastery, with conjugation and synonyms in every card
DIY flashcards like Anki	Ready illustrated decks: zero setup time, faster time to value
English-only apps	Any-to-any language pairs, e.g. Greek from Russian or Spanish from Bulgarian

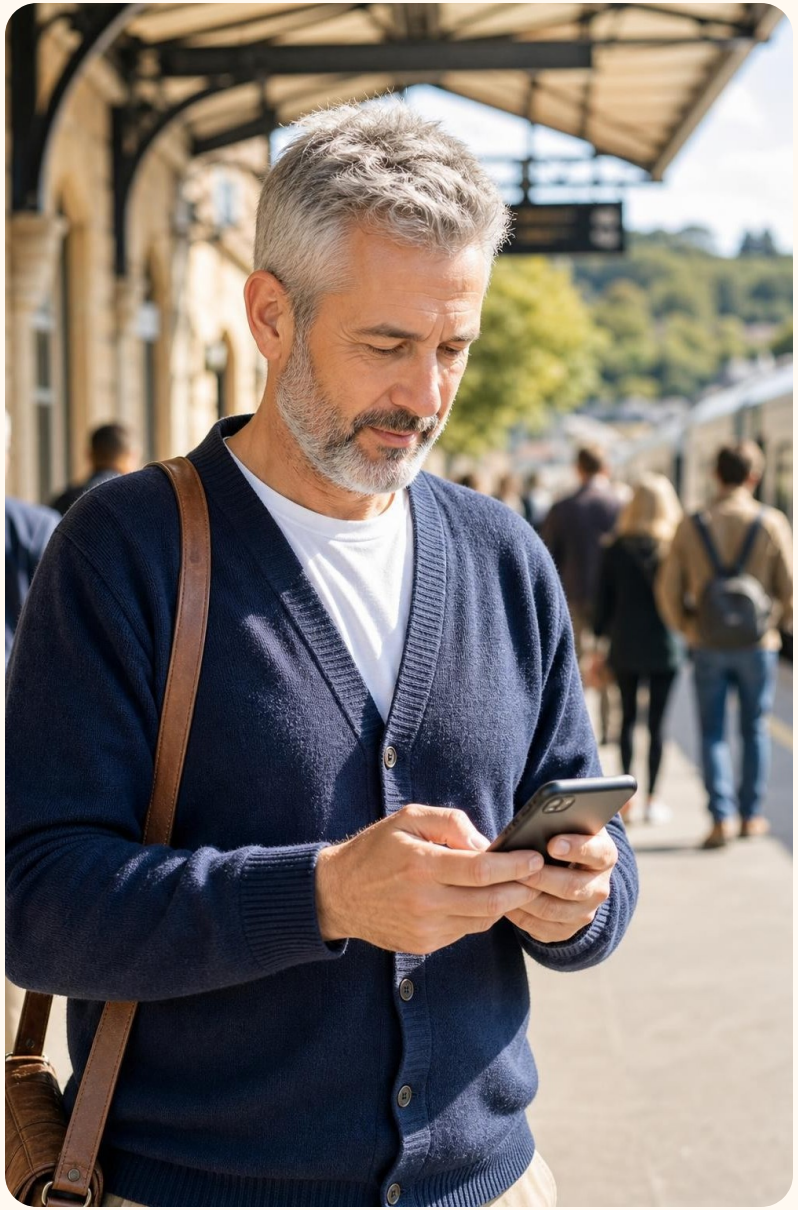

Measurable value for every learner segment

Learners
Daily sessions build durable retention.

Expats and relocators
Faster everyday integration.

Teachers and schools
Shared decks save prep time.

Professionals
CEFR-level upskilling.
